Operating Systems

- Linux
- Ubuntu
- Mac
- Windows

Other Technologies

- Javascript
- PHP
- Django
- Angular
- Ionic
- C

Professional Experience

Thirstie 2018 - 2019

Python Developer

This was my first job and I was hired as a trainee. My first responsibility was to integrate customers inventory with our system, this integration was personalized by me for every customer. The I started working with the reports system for product, this was the gathering and organized of information for product.

- Team Sizes: At first it was a small team size, but at the end the team grow a lot
- Projects: There was two big projects were I worked on the first one is the integration of new customers and the reports service. Then I started working with the migration of the notification from the old version of the system to the new one.
- Technologies used: Python, Docker, Flask, Tornado, SQL, Pandas, S3, React

Vero 2019 - Present

Python Developer / Support Developer

It was the support engineer within Vero. This included fixing errors, bugs and problems in our system when product encounters one, this included changing database information, running, creating or updating scripts and updating our code to fix errors

- I enter as a support engineer and then I started developing the new version of the system. It was my responsibility to manage the design and development of some of the company entities were, as a support engineer, I was familiar with. This included managing the overall operation of the IT systems and software.
- Technologies used: Python, Django, Docker, GRPC
